Subject: FW: Aircraft Drinking Water ALERT - CRW Airport - (Yeager Airport) Charleston, West Virginia - DO NOT USE WATER

Hi Ghassan, Karen, and Roberta,

This is the alert that I sent out to my Regional carriers. When you have an update, can you please let us know.

Thanks
Jatin

Subject: Aircraft Drinking Water ALERT - CRW Airport - (Yeager Airport) Charleston, West Virginia - DO NOT USE WATER

Dear Region 6 Air Carriers,

I want to inform you of a drinking water alert that impacts the Yeager Airport in Charleston, West Virginia. The Airport Code is CRW and CRW airport is in Kanawha County. The water system provider, West Virginia American Water, has a DO NOT USE water alert due to a chemical spill in the Elk River causing a contamination of the drinking water.

Per West Virginia American Water:

"West Virginia American Water has issued a DO NOT USE WATER NOTICE for all West Virginia American Water customers in Kanawha, Boone, Putnam, Lincoln, Logan, Clay, Roane and Jackson counties, as well as customers in Culloden in Cabell County. A chemical spill occurred along the Elk River, causing contamination of your water. Due to the nature of the contamination, as a precaution, customers should not use their water for any purpose. Bottled or alternative sources of water should be used for drinking, making ice, brushing teeth, washing dishes, bathing, food preparation, baby formula and all other purposes until further notice. Water quality specialists continue to monitor water, and crews

will conduct flushing throughout the distribution system. West Virginia American Water will inform you when it is determined that the water is once again safe to use."
